

CSEE and IS Joint Department Seminar

Gender and Computing

Dr. Maria Klawe

This talk explores how girls and women differ from boys and men in their uses of and attitude toward computing technology and how this affects career choices and technology design. From playing video games to pursuing computing careers, the participation of females is lower than that of males. Why is this? Dr. Klawe will discuss research findings, as well as best practices for increasing the participation of girls and women in computing.

Friday, September 19, 2008

1:00 – 2:30 p.m.

ITE 229

Penny Rheingans (CSEE) and Ant Ozok (IS) co-hosts

Dr. Maria Klawe
President, Harvey Mudd College

Maria Klawe became the fifth president of Harvey Mudd College on July 1, 2006. Prior to joining HMC, she served as dean of engineering and professor of computer science at Princeton University. During her time at Princeton, Maria led the School of Engineering and Applied Science through a strategic planning exercise that created an exciting and widely embraced vision for the school. At Harvey Mudd College, she is leading a similarly ambitious strategic planning initiative known as "HMC 2020: Envisioning the Future."
