Edge Comes to You 2012
Expect more from your storage

IBM launched its inaugural storage conference, IBM Edge, in Orlando, Florida. This sold-out conference was a major succuss and customers want to hear more. On September 20, CAS Severn will bring CAS Edge to you in a live event at our Laurel, MD offices. If you missed the unprecedented and market first storage announcements made by IBM at the Orlando conference, you don't want to miss this event.

Our premium speaker, Jack Arnold, from the IBM System Storage Executive Briefing Center and a member of the XIV and DS8000 Product Development Team, will discuss "Technology Trends in IBM Storage" and his keynote will be followed by breakout sessions on other storage related topics:

- IBM Real Time Compression of Primary Active Data
- TSM in 2012 : CAS Severn's experience with V6.3 features
- Storage Management using TPC 5.1 - How to tier your software automatically
- XIV Gen3 Update
- V7000 for Virtual Desktop Workloads
- SAN Volume Controller (SVC) for VMware MetroCluster
- IBM PureSystems and PureFlex - Come see one live. What is Pure? It's THE System platform of the future. It's the best of both open and integrated.
- Plus more

Live demonstrations will be available for Realtime Compression, TPC 5.1, TSM, IBM XIV, V7000, SVC, and PureFlex in our Innovation Center.

You'll get a chance to speak to our experts one-on-one about your storage environment and hear what they think the future holds for storage.

Date: Thursday, September 20, 2012
Time: 9:00am
Location:
