Founded in 1966 as the Baltimore region's public research university, UMBC is a vital link in Maryland's bioscience sector. Nearly 60 percent of UMBC students major in science and technology fields. UMBC graduates are actively recruited by corporate partners such as Battelle, MedImmune, Wyeth Research, BD Diagnostics and Grace Davison. All funds received are managed by the UMBC Foundation for the benefit of UMBC.

UMBC

AN HONORS UNIVERSITY IN MARYLAND

UMBC—An Honors University in Maryland invites you to participate in ***A Look Ahead XII: Futures in Biomedical Research.***

Attended each year by hundreds of scientists, educators and biotechnology business leaders, the symposium provides a unique opportunity to network with the region's leading biotech executives and entrepreneurs.

Sponsors will hear nationally recognized speakers, meet talented UMBC graduate and undergraduate students and participate in a VIP reception following the talks.

Proceeds of the symposium directly support the departments of Biological Sciences, Chemistry and Biochemistry, and Chemical and Biochemical Engineering.

Take this opportunity to connect with talented UMBC faculty, alumni and students and members of our bioscience business community at ***A Look Ahead XII!***
