

Most Mentioned Faculty – Fall 2007 Blackboard Survey

The faculty members included in this list, were those most often mentioned as outstanding users of Blackboard by graduate/undergraduate students responding to the Fall 2007 Blackboard Users Survey.

Instructor	Department	Mentions	Student Comment
Tara Carpenter	Chemistry	88	She effectively relays information on a daily basis and it reinforces lecture. It is also a great supplement for grades.
Lili Cui	Physics	21	PHYS 111 she posts all the lectures, labs, quizzes, exams, grades, homework and assignments. Discussions for homework, labs, and exam review and question answers.
Ram Hosmane	Chemistry/Biochemistry	11	Dr. Hosmane uses BB to post all past quizzes and exams that aid us in preparing for current exams; as well as giving us quizzes that we do for a grade. He frequently posts updates.
Marcus Zupan	Mechanical Engineering	9	Dr Zupan because grades are quickly posted, course announcements are regular, and he is

			the only professor I have that utilizes the survey and homework capabilities of blackboard.
Michael Boyd	Music	8	He posts grades, discussions boards are constantly updated, quizzes online help us prepare for exam question, and the days lecture outlines are posted online for us to use and to print to take extra notes on.
Eileen O'Brien	Psychology	7	Dr. O'Brien in psychology because she posts grades as soon as they are ready and she sends out an announcement to let us know. She also posts her quizzes and PowerPoints.
Danna Smith	Education	6	She posts the documents we need and we can retrieve them. She makes sure that we are able to get grades and review work proficiently.
Kriste Lindenmeyer	History	6	He posts multiple course documents for students to use to their advantage on exams and reports.
Clayton Laurie	History	6	The discussion boards for HIST303 encourage students to share knowledge, interact with each other, explore the material outside of class, and

			ask questions of the professor or teaching assistants. Dr. Laurie also has various resources, including interesting facts sheets, important information on class dates and assignments, recommended reading lists, and a good deal more. Dr. Laurie's use of Blackboard makes it an excellent tool for succeeding in his class, even for someone who is not necessarily a technophile.
Nicole King	American Studies	6	She regularly posts announcements and includes all handouts under the Course Documents tab. She also has created a class wiki for us, which is pretty cool. Additionally, she requires us to use the discussion boards. Although they are not really used for discussion, it is nice when some documents do not have to be submitted in hard copy form. Besides the lack of discussion (which isn't really her fault), the only critique I have of her use of Blackboard is that she doesn't use the grade component.
Karen Freiberg	Psychology	6	Dr. Freiberg, because we have many online labs/quizzes to do that help us prepare for our exams.
Jamie Falcon	Economics	6	

			<p>He uses it to set up a grade sheet that students can access. Using the Excel spreadsheet, we can manipulate our grades to see what we need to get on homework, tests, etc. to get the grade we want in the class. Jaime is also very proficient in updating Blackboard with assignments, making it available to students quickly.</p>
John Borreo	Psychology	6	<p>Dr. Borrero, there are online quizzes due once a week, and he uses announcements to remind us. Also all the class notes are posted on Blackboard as well as the study guides. Everything for the class is posted.</p>
Robert Anderson	Psychology	6	<p>Professor Anderson of my psychology 100 class uses blackboard well. Through blackboard we are required to do quizzes for each chapter that help us study for the exam. The online quiz grades are automatically posted and the exam grades are posted very quickly.</p>
Eric Anderson	Physics	6	<p>Dr. Anderson from physic department. He is the pro of Bb because he knows how to upload all kind of learning materials onto Bb and we are also required to use the class discussion function in Bb.</p>

Diane Alonso	Psychology	6	Doctor Alonso uses Blackboard for everything. I like the fact that she always put the homework up one week in advance and puts up announcements.
Karen Sutton	Africana Studies	5	Professor Sutton because she is the only one who posts ALL grades on Blackboard so your overall grade in the course is accurate and available to you through the progression on the course.
Samantha Riley	Mathematics	5	She updates blackboard with every quiz, homework assignments, exams and course documents.
Steven Pitts	Psychology	5	Stephen Pitts. Has an incredible amount of material, charts and tables, links, and supplemental lecture information accessible.
John Laur	Social Work	5	Dr. John Laur because he posts all the assignments, we post our assignments on blackboard, we use blackboard in class, and he posts news for classes almost every week.

Amy Everhart	Information Systems	5	Mrs. Everhart, because the entire class revolves around blackboard.
Robert Anderson	Psychology	5	Dr. Robert Anderson has consistently posted important announcements, study guides, and assignments.
Laura Stapleton	Psychology	4	She takes advantage of all the Blackboard features necessary for our course. She administers quizzes online and she gives us the entire weekend to take the quiz. Grades are quickly posted online and documents are easily accessible via blackboard.
Donald Snyder	Media and Communication Studies	4	Professor Donald Snyder does a good job posting all of the materials from the class up on Blackboard and making grades available online in a timely fashion.
Mark Perks	Chemistry	4	Professor Perks, for Organic Chemistry, puts up old tests, all the lecture slides, the grades, and lots of other supplementary materials.
Katherine Morris	Social Work	4	Professor K. Morris for SOWK 240. The class is

			Technology in Social Work and so is supposed to teach social work students how to use various tools for research and professional use. Many of us are not familiar with available technology and Blackboard is a good complement to the course content.
Steven Miller	Biology	4	Dr Miller: Grades are always posted with feedback, and he uses it to provide a large amount of information to supplement the class.
Dr. Norman Meres	Interdisciplinary Studies	4	He constantly emailed students and posted announcements. Grades were posted as well. All are very helpful!
Stephen Freeland	Biology	4	Professor Freeland of BIO301 because he posts exam grades with grade-spread graphs, encourages reading of supplemental documents, and facilitates group discussion using the discussion board function.
