The Master of Professional Studies: Industrial/Organizational Psychology Program is designed to provide advanced education to early/mid-career professionals in the areas of human capital functions, personnel selection, and training and organizational management. The I/O Psychology program explores and integrates important topics including organizational behavioral management, human factors, and professional human resources practice. The program culminates with a professional capstone experience, allowing students to build strong relationships with faculty practitioners and industry professionals.

The M.P.S. degree is a unique, highly applied program, which includes an Advisory Board comprised of representatives from business, industry, and government. This ensures that our graduate training is focused on developing skills that are relevant in today’s job market. In fact, graduates of our I/O Psychology program are now employed across the nation at companies such as Booz Allen Hamilton, the Social Security Administration, Homeland Security, Johns Hopkins Medical Center, among other organizations.

Master of Professional Studies (M.P.S.):
INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
(30 CREDITS)

The M.P.S.: I/O Psychology degree requires 30 graduate credit hours, distributed through 15 credits in core courses, 12 credits in specialty courses, and the capstone course (3 credits).

Required Core Courses:

PSYC 670 Industrial/Organizational Psychology
This course covers a general survey of industrial/organizational psychology, including such topics as personnel selection and evaluation, job satisfaction, environmental factors and current research on individual behavior in complex organizations.

PSYC 671 Social Psychology
Class sessions involve regular discussions and exchanges of information among students and the faculty member on topics of social psychology. Discussion topics include perception and attribution, attitudes, self-identity, interpersonal attraction, close relationships, social influence, persuasion, prosocial behavior, aggression, group behavior, job satisfaction and work, quality of life and mental health, and forensics. Particular focus is on how the content of these topics can be applied to real-world situations for increased individual and group well-being and productivity.

PSYC 672 Introduction to Data Analytic Procedures
This course gives students the background and the basic understanding of statistical theory and techniques required in the field of I/O Psychology. The course provides an overview of descriptive and inferential statistics, with emphasis on statistical techniques used in the practice of I/O Psychology, including analysis of variance and multiple regression. Students are also introduced to the advanced topics of analysis of covariance, factor analysis, reliability analysis, discriminant analysis, and path analysis. This course is required for all students.

PSYC 674 Methods of Assessment
This course provides an I/O-oriented introduction to intellectual and personality assessment of individuals working in organizations. In addition, it gives an introduction/overview of basic measurement theory; essentials of test evaluation including reliability, validity and utility; methodology of test and survey construction, development, and analysis; and the utilization and interpretation of test scores. Prerequisite: PSYC 672: Intro to Data Analytic Procedures.

PSYC 667 Professional Human Resources Practice
This course gives an overview of personnel selection from an I/O prospective in terms of theory, practice, and research. Topics include needs analysis, personnel practices and placement, interviewing (research and techniques), and performance appraisal, training and development. In addition, validity and utility of predictors of job performance will be addressed as will Equal Employment Opportunity (EEO) laws and their implications in terms of personnel selection, retention, training, and management. Prerequisite: PSYC 670: I/O Psychology.

PSYC 673 Legal, Ethical and Professional Issues
This course addresses ethical issues involved in the practice or application of psychology in promoting employee and organizational physical and mental health and well-being. In addition, students will discuss legal issues, such as EEO, affirmative action, ADA as well as issues relating to individuals of different ages and cultures, health status, organizations and local, national, and international communities, the legal system and policy making. Also, highlighted are issues of ethnic and cultural sensitivity and sexual harassment. Prerequisite: PSYC 672: Intro to Data Analytic Procedures.

Capstone Course:
- Practicum in I/O Psychology

Specialty Courses:
- Change Management
- Group Decision Making
- Human Factors
- Human Performance Technologies
- Organizational Behavior Management
- Organizational Surveys
- Program Evaluation
- Strategic Planning
- Instructional Systems Development (Select semesters available online through ISD program as EDUC 602)
- Principles in Training and Development (Select semesters available online through ISD program as EDUC 671)
