CURRENT CATALOG DESCRIPTION: This intense course is a blend of fieldwork in emergency health services and integrating seminars. Supervised on-site experience in EHS management situations, seminar sessions integrating knowledge, skill and current issues are also considered. Prerequisites: Completion of all required courses and permission of the instructor. Notes: Open to majors only.

PROPOSED CATALOG DESCRIPTION: no changes X change in description

This intense course is a blend of fieldwork in emergency health services and integrating seminars. Supervised on-site experience in EHS management situations, actual work-related projects, are integrated with knowledge, skills and current issues through seminar sessions. Consideration will be given to students with significant EHS work experience or current employment to complete this required course with less than 15 hours. Placements and focus will be tailored to the needs of the registrants. **Pre-requisites: Completion of major requirements and permission of the instructor. Notes; Open to majors only.**

RATIONALE FOR CHANGE:

Eliminating EHS 451 and making EHS 450 variable credit up to 15 hours provides some flexibility in the program to accommodate academic and work schedules and students experience in the field. Additionally some organizations can accommodate an intern better in a less than 40-hour commitment **that** our one semester 15-hour credit course currently requires.
