### **Solutions to the Japanese American “Problem”**

The year is 1941, and you are an advisor to President FDR. The President is concerned about the high concentration of Japanese Americans on the West Coast. Many Americans question Japanese American loyalty and want to prevent any espionage. One proposed solution is to move Japanese Americans to internment camps under military control.

In your groups, develop at least 3 other possible solutions and evaluate the pros and cons of each one. Then come to a consensus on which option seems to be the best solution. Be prepared to discuss why.
